

# OF SERIES

Oil Free Screw  
Air Compressors

45 - 450kW / 60 - 600hp

**ELGi**<sup>®</sup>

Always Better.

# OF Series

100% Class 'O' Air | Reliable  
Low Energy Consumption

## Air Quality Matters

The quality of air is vital in sensitive industries like Food and Beverage, Textile, Pharmaceuticals, and Dairy. The implementation of environmental regulations to reduce the carbon footprint has made industries conscious of their impact on the environment while increasing quality and performance. In the past, companies had to deal with high costs and low efficiency.

With over 60 years of experience, ELGi brings you a disruption in oil free compressed air technology. ELGi's oil free range offers reliable performance which is 100% oil free at a low operational cost.

**Oil Free Air is Used Directly in the Entire Manufacturing Process in these Industries.**

**FOOD & BEVERAGE**

**TEXTILE**

**AUTOMOTIVE**

**CEMENT**

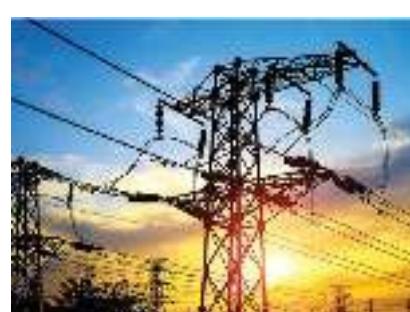

**METALS**

**OIL & GAS**

**PHARMACEUTICALS**

**POWER**

**ELECTRONICS**

Nearly 2 million litres (over 0.5 million gallons) of oil is released into the atmosphere every year.

As a result of global climate change and air quality concerns, we see an increase in collaborative international efforts to reduce the concentration of greenhouse gases and critical pollutants.

## ELGi Oil Free Technology

	<b>100% Class-0 Air</b>		<b>Customised Solutions</b>
	<b>Reliable Products</b>		<b>Remote Monitoring System</b>
	<b>Low Life Cycle Cost</b>		<b>Air Audit System</b>
	<b>Customer Satisfaction</b>		<b>Innovative Systems</b>

ELGi is among the few air compressor manufacturers in the world that designs and builds oil free airends. The  $\eta$ -V rotor's slow running speeds reduce pressure losses and improve efficiency, resulting in a more effective compressed air system.

The component configuration of the OF Series machines has been optimised for easy serviceability and reduced service time. The compressors are light weight, compact and lower air outlet temperatures.

# OILFREE™

CLASS-0 ISO 8573-1

## Consistent Class '0' Oil Free Air

The OF Series consistently produces oil free air that meets ISO 8573-1 class '0' air requirements. The metal surface of the rotor is coated with a food-grade coating to ensure clean, oil free air without any metal particles. Pipes have a special e-coating that ensures clean, oil free air all the time. The optimised rotor clearances provide consistent air delivery.

**Made for industries where there is absolute intolerance of oil vapour present in the entire manufacturing process.**

### Proprietary Technology

The oil free air compressors are designed and developed using our in-house oil free technology to provide maximum uptime and reliability. The  $\eta$ -V rotor design from ELGi eliminates pressure losses and improves stage efficiency, resulting in a more efficient compressed air system. Slower rotor speeds mean less wear and tear, less vibration, and more stable long-term performance.

Every component in the ELGi OF Series, starting from design and manufacturing to quality testing, embody the philosophy of Uptime. The materials used ensure long life, reliability and ruggedness under wide ambient conditions to provide you with oil-free air for uninterrupted and seamless productivity.

**Rotor**

**Coolers**

Rotor and housing are coated with a proprietary coating to resist corrosion and endure high temperatures up to 250°C. This results in optimum long-term performance with no loss in efficiency.

Cupronickel coolers with a water-in-tube system for better heat transfer, least fouling factor in its kind with best thermal efficiency.

### Bearings

- Run at low speeds and high temperatures.
- Optimized for oil free compressor speeds and temperatures considering the load and unload conditions.

### Oil-Seal

- Non-contact type Visco seals made of Bronze.

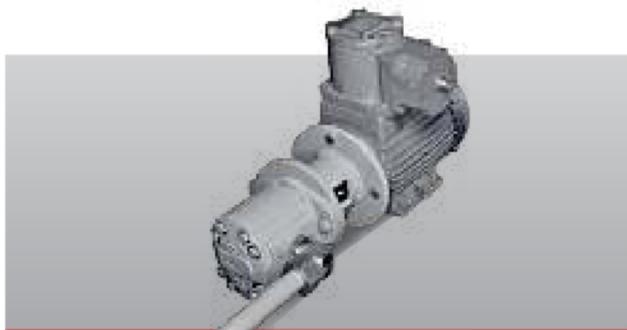

### Casing

- Completely coated with proprietary coating (Food Grade).
- Water jackets are also coated with the same coating.

### Air Seal

- Carbon impregnated SS Floating type seals.
- Axially locked by Belleville spring and radially locked by compressed air.

### Oil Pump

- Separate motor-powered oil pump ensures lubrication before and during the start of machine (ensuring no dry running of gears and bearings).
- All oil tubing is made of stainless steel to increase reliability.

### Timing Gears

- Helical gears, precision ground to DIM 4 quality and case hardened to minimize transmission losses and noise during operation.
- Dynamically balanced to reduce vibrations by optimizing the loads on bearings and increase bearing life.

## Features & Benefits

### Superior Warranty

ELGi's OF Series compressors come with a superior warranty as they are built to ensure long life, reliability, and durability because of the superior design, global manufacturing standards, quality tests, and components.

### Low Maintenance Costs

The Rack and Pinion capacity control system can power more than one million cycles with no maintenance. By reducing the pressure band, the machine operates numerous cycles in a minute thereby saving energy and maintaining pressure discharge. This considerably lowers the cost of ownership.

### Reliable Functioning

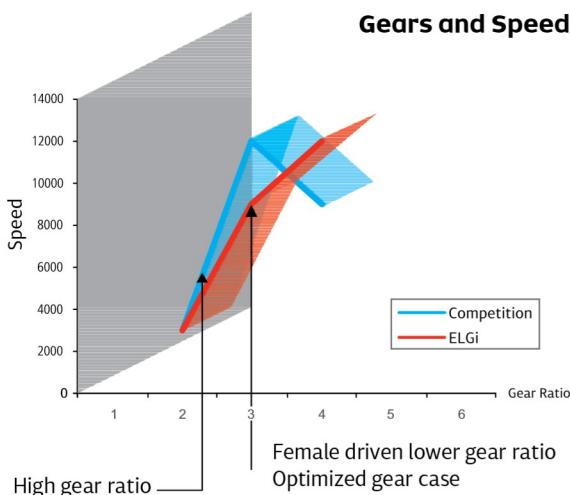

The use of rigid stainless-steel tubes improves compressor reliability and lowers maintenance costs. The compressor can work in temperatures from -5°C to 45°C.

### Low Cost of Ownership

The compact and energy efficient design reduces life cycle cost and lowers the cost of ownership. The use of low-pressure cooling-water heads reduces the amount of energy used by feed water pumps. The cooling water pump reduces power consumption. The optimised airend design provides best-in-class efficiency and a fast return on investment.

## Neuron IV Controller

- Seamless Integration with Air ~ Alert
- 7" LCD touch display
- Future ready with open-platform-communication (OPC)
- Advanced communications (CAN, Ethernet)
- Over-the-air (OTA) firmware update
- Multiple compressor control (Automatic sequencing and cascading)
- Suitable for feature up-gradations
- Multilingual - can support up to 32 languages
- Reliable design

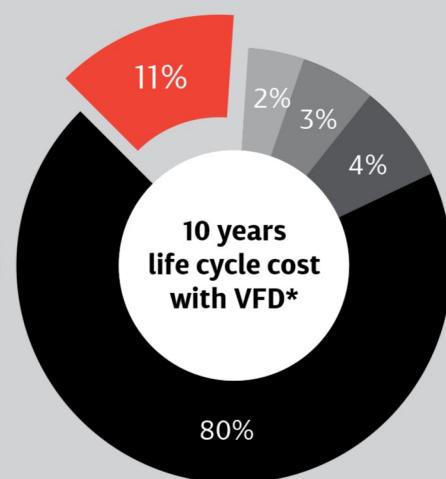

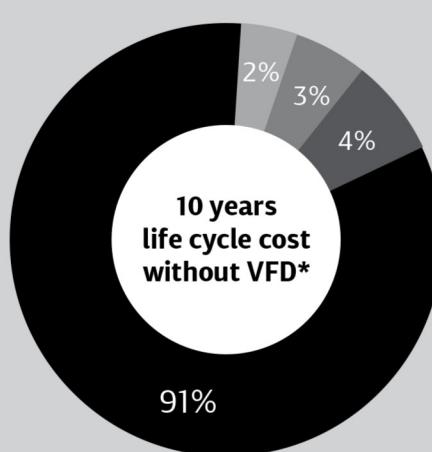

## Reliability/ Working Conditions

- Lower speed of airend gives **better reliability** due to lower gear ratio.
- Usage of rigid stainless-steel tubes **improves product reliability** and reduces maintenance.
- Load unload **pressure differential is 0.2 bar g**.
- Design ensures **reliable operation in the working temperature range of -5°C to 45°C**

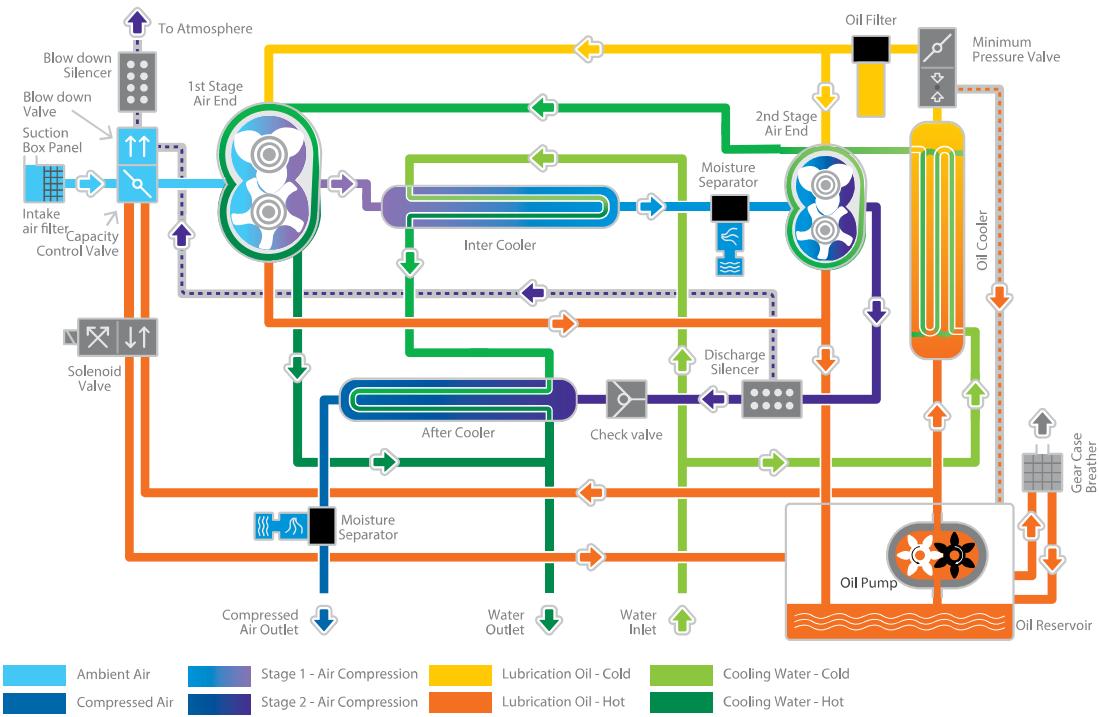

## Improved Cost Of Ownership

ELGi OF Series is designed to deliver quick returns on capital invested by reducing the operating cost.

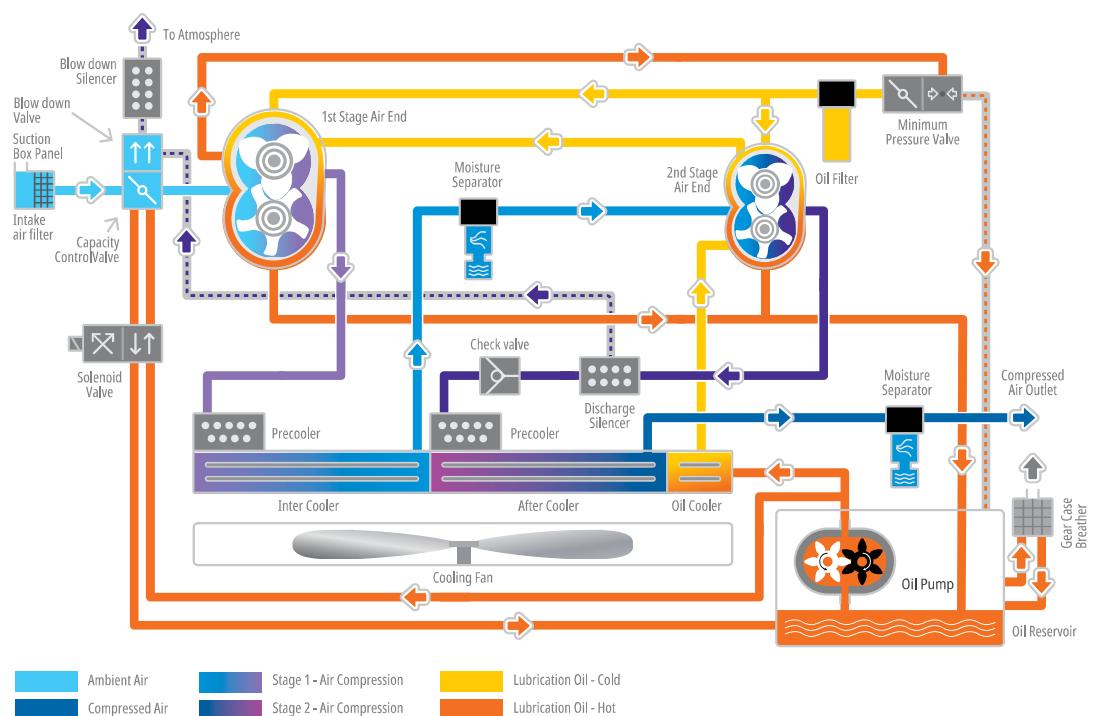

- |  |  |

**Note:**

1. Free Air Delivery (FAD) is tested as per ISO 1217 : 2009 - Annex C
2. FAD indicated is for the full package measured at the outlet
3. Weight indicated is approximate and actual can vary significantly
4. Due to continuous improvements, specifications are subject to change without prior notice
5. Displayed here is the standard range. For customized packages with different voltages, medium and high voltage motor, pressure variants, please contact our nearest sales office
6. All standard packages can be offered with built-in VFD. Please contact our nearest sales office for specifications and turndown details
7. The ambient temperature operating conditions -5°C to 45°C
8. Sound level measured as per ISO 2151, Second Edition at 1m distance in field conditions, +/-3dB(A)
9. All motors can be supplied for various country standards like ABNT, NEMA and IEC however packages(dimensions & weight) may vary

## After Sales Products and Services

**A wide range of after-sales products and services by ELGi is designed to add maximum value to customers. ELGi's quick service processes ensure the optimum availability and reliability of compressors with the lowest possible operating costs.**

### Genuine Spares and Service

Genuine spares and services from ELGi help to avoid unexpected compressor failures and the risk of subsequent damage to other vital compressor components. ELGi spares are designed, manufactured, and checked for quality to meet the standards of a new ELGi compressor. ELGi consistently focuses on

improving spares to provide customers with the best results.

### ELGi Air Audit

ELGi air audit program helps improve compressors' performance by identifying the areas of wastage in the system. ELGi air audit services are offered for generation, distribution, and demand-side systems.

## VALUE ADDED SERVICES

### Downstream Accessories

ELGi provides a wide range of air-cure solutions for industries that require specific downstream air requirements.

Downstream Filter

EZL Drain

Air Receiver

## Certification

CE  
UK  
CA

1. Product CE certified
2. Air Quality Class "0" per ISO:8573(P-2):2007
3. Product Performance ISO 1217:2009
4. Pressurized Components ASME "U" stamping (USA); PED (EU); Work Cover/Plant Design Registration (Australia); DOSH (Malaysia)
5. Electricals UL & CE certified
6. Materials & Processes FDA approved per EU regulation (EC) No 1935/2004

ELGi's manufacturing plant in India is **ISO 22000 Certified**, demonstrating our dedication to providing food and beverage sectors across the world with consistently superior solutions.

## ENERGY SAVING ACCESSORIES FOR A CLEAN, GREENER AND SUSTAINABLE FUTURE

### Variable Frequency Drives (VFD)

The In-built ELGi Variable Frequency Drives (VFD) match the compressor output with the demand by varying motor speed which reduces the power consumption and subsequently results in savings.

The VFD helps eliminate frequent load-unload cycles and wasted power from the energy bill. In a fixed speed compressor with a Star-Delta starter, the starting current is as high as three times the Full Load Current (FLC). With ELGi VFD, the starting current is less than the FLC.

### Advantages

- Energy savings
- Improved power factor
- Low starting current and hence reduced maximum demand
- Reduced maintenance
- High efficiency combined efficiency drive system

### Six Reasons To Choose ELGi Air Compressors

1. Lower Life Cycle Cost
2. ELGi Technical Edge
3. Reliability
4. Global Service Network
5. Superior Warranty
6. Proven Results

**Always Better.**

Elgi Equipments Limited is a global air compressor manufacturer with a broad line of innovative and technologically superior compressed air systems.

ELGi has consistently worked towards ensuring that its customers achieve their productivity goals while keeping the cost of ownership low. ELGi offers a complete range of compressed

air solutions from oil lubricated and oil free rotary screw compressors, oil lubricated and oil free reciprocating compressors and centrifugal compressors, to dryers, filters, and downstream accessories.

The company's portfolio of over 400 products has found wide application across industries.
